Description:

An examination of the recently resurgent trend of charm bracelets looks at the history and cultural importance of the charm bracelet, as well as interesting and unique ways to personalize bracelets, all illustrated with ninety color illustrations. 15,000 first printing.

All of the reviews of this book made me think it would be better than it is. It is fine--a short book with pictures of some absolutely stunning charm bracelets, many of which are 14K gold or so rare/rarefied that normal charm collectors would not think about such bracelets as being possible for themselves. The commentary is very personal and some people adore her stories but I found them somewhat precious and shallow. Shes a Zabar and lives in New York City so her milieu is way above the norm, and when she does try to impart information I think its the kind of factual stuff that a modern-day Marie Antoinette might need, either really superficial or really for the super-wealthy. For instance: she says one must always have all charms on a bracelet soldered. Good advice in a way, because obviously its the most secure. But very expensive and also does not allow easy changing or revising of a bracelet, and it means you need a good relationship with a working jeweler. I like making jewelry and making

bracelets and I do not solder my charms so I can add or rearrange as I wish. There are fairly secure ways of doing this without soldering. For my use/purposes I think other books are more instructive--especially Charms and Charm Bracelets by Joanne Schwartz.
